

Green-e for Natural Gas Sellers

Carbon offsets + natural gas

For more information on certification, visit:
green-e.org/climate

About us:
green-e.org

Natural gas use impacts the environment

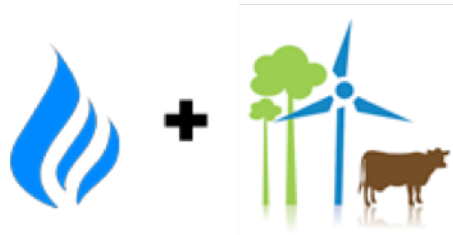

Using natural gas causes greenhouse gas emissions that contribute to climate change.

Customers care about sustainability

Residential, commercial and industrial customers are looking for green solutions.

Start a carbon offset natural gas program

Bundle high-quality carbon offsets with natural gas to attract sustainably-minded customers. No change to natural gas supply.

How it works

1. Open a registry account and purchase carbon offsets
2. Sell carbon offsets to customers based on natural gas usage
3. Certify your program to use the Green-e Climate logo

Climate

Getting started:

Contact Green-e Climate
Visit www.green-e.org, email
climate@green-e.org, or call
415-561-2100

Third-party certification gives consumers confidence in your program

- Boost overall program quality
- Meet industry best practices for marketing and sales
- Help customers earn points for LEED and other environmental standards
- Use the trusted Green-e Climate certification logo
